Spanish, Russian — conversational

TECH STACK

Frontend

React · TypeScript · JavaScript · Angular · Next.js · Vue.js · HTML/CSS · Webpack · Gulp

Backend

Node.js · Python/Django · Celery · Java/Spring Boot · .NET · PHP/Laravel · REST · OAuth 2.0/JWT · WebRTC

Data & Cloud

PostgreSQL/SQL · MongoDB · Redis · Elasticsearch · RabbitMQ · AWS · Azure · Docker · CI/CD · Automated testing · Git · Linux/macOS

AI / LLM

Claude · Cursor · OpenAI · Gemini · LLM integration · RAG

Mobile

React Native · Flutter · iOS

COMPETITIONS & AWARDS

🥉 **Bronze Medal** — Romanian National Olympiad in Informatics (2013, 2014)

🥇 **1st Prize** — "Grigore Moisil" inter-county contest, Informatics (2012)

🥉 **3rd Prize** — "Grigore Moisil" (2014); Honourable Mention (2013)

🥈 **2nd Prize** — ITeam_net, Programming (2014)

🏁 **Finalist** — MindCoding algorithms contest (2014)

🥇 **1st place** — Mathematics Olympiad, Cluj-Napoca local stage

💯 **10/10** — Informatics C/C++, Baccalaureate

⚔ Active on Codeforces, LeetCode, HackerRank, Infoarena

Alessandro-Paolo Alghisi

Senior Full-Stack Engineer · Python / React · 11+ years

PROFILE

Senior full stack engineer with 11+ years shipping web and mobile products end to end — Python (Django, FastAPI) and Node.js backends, React/TypeScript frontends, PostgreSQL with schema migrations, automated testing, Git, CI/CD and Docker, on AWS and Azure. Hands-on with LLM applications and Claude: I build with Cursor + Claude daily and have shipped LLM features (translation, document generation) into production products. Two Google internships (Chrome, Logs), 6.5 years scaling Bayut.com and Zameen.com to millions of users, and a strong algorithmic background from national informatics olympiads. Comfortable owning architecture, leading small teams and mentoring.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer
Jan 2026 – Sep 2026

Raw Geeks · remote

- Drove the Angular → React migration of a large monolithic platform (Gulp build); contributed to architecture decisions.
- Shipped an LLM-powered translation feature (English → Haitian Creole) end to end; used Cursor with Claude to speed up and debug the migration.

Full Stack Developer
May 2025 – Dec 2025

Complaion · Milan, Italy (hybrid)

- TypeScript/React + Node.js on PostgreSQL and AWS Lambda; OAuth integrations with Google and Microsoft Entra ID.
- Proposed and shipped LLM translation (Italian → Spanish) and LLM-generated ISO compliance document templates (OpenAI on Azure).

Senior Video & Full Stack Consultant (Contract)
Sep 2024 – Sep 2025

Freelance · remote

- Built **Collab**, a Zoom-like React / React Native app: Google sign-in, calendar, live pair-programming IDE (Monaco, multi-cursor, remote code execution).
- Zoom Video SDK and Cisco Webex SDK proofs-of-concept; security (SOC2), licensing and scalability evaluations.
- Adobe Experience Manager work (HTL, Sling Models, OSGi, React components); Next.js, SST, Prisma/Drizzle projects.

Senior Full Stack Engineer
Sep 2017 – Mar 2024

Sector Labs — Bayut.com & Zameen.com · Cluj-Napoca

- 6.5 years on high-traffic property portals serving millions of users across MENA and South Asia.
- Python/Django with Celery + RabbitMQ, React/TypeScript, Node.js, PostgreSQL (schema migrations), MongoDB, Redis, Elasticsearch, AWS, Docker, CI/CD.
- Migrated the legacy PHP/Laravel platform to Node.js, Python and React while keeping both in sync.
- Championed the React class → Hooks migration; led teams of 2–4 developers and interviewed candidates.

Software Engineer — LoadRunner
Feb 2017 – Sep 2017

Hewlett Packard Enterprise

Software Engineering Intern — Logs team
Aug 2016 – Nov 2016

Google · Mountain View, USA

- Automatic policy-release system integrated with Google's release framework (C++, Python); logging prototype with ~15% efficiency gain.

Software Engineering Intern — Chrome team
Jan 2016 – Apr 2016

Google · Kitchener, Canada

- Implemented and shipped pinch-to-zoom for Chrome's PDF viewer (C++, JavaScript, touch events, linear algebra).

Software Engineering Intern
Jun 2015 – Aug 2015

Algotech Solutions · Cluj-Napoca — Node.js, SQL

Software Engineering Intern
Jan 2015 – Mar 2015

Yardi Systems · Cluj-Napoca — real-estate data tooling, Perl

EDUCATION

MSc Software Engineering
2020 – 2022

Technical University of Cluj-Napoca

BSc Computer Science
2014 – 2017

Babeș-Bolyai University, Cluj-Napoca — thesis: Raspberry Pi router with built-in ad blocker

Mathematics–Informatics
2010 – 2014

"Onisifor Ghibu" High School, Cluj-Napoca
