Code	github.com/alexalghisi
Base	Cluj-Napoca, RO · remote (CET)
Status	EU citizen (Italian passport)

SKILLS

Frontend
React (Hooks, SSR), Redux, TypeScript, JavaScript ES6+, Next.js, AngularJS, HTML5/CSS3, Tailwind, Gulp

Backend
Node.js (Express, NestJS), Python (Django, FastAPI), PHP/Laravel, REST, GraphQL, WebRTC, OAuth 2.0/JWT

Data
PostgreSQL, MongoDB, Redis, pgvector, Pinecone, Elasticsearch

AI / LLM
RAG, agents and tool calling, LangChain, Vercel AI SDK, OpenAI, Gemini, Claude, prompt evals

Mobile
React Native (Expo), Flutter, iOS

Systems & Ops
C++, AWS, Docker, CI/CD, Git, Linux and macOS (daily driver), AEM

FREELANCE PROJECTS

Collab
Video meetings with a shared, runnable code editor · github.com/alexalghisi/collab

8 live client sites
cabanly.ro, bremenauto.ro, grileadmitere.ro, meditatiidirect.ro, optimcatering.ro, collaborare.ro, dcorentacarcluj.ro, etichetetextile.ro

EDUCATION

M.Sc. Software Engineering
Technical University of Cluj-Napoca · 2020–2022

B.Sc. Computer Science
Babeș-Bolyai University · 2014–2017
Thesis: Raspberry Pi router with an ML ad blocker

Mathematics–Informatics
"Onisifor Ghibu" High School · 2014

LANGUAGES

Italian	native
Romanian	native
English	fluent (C1)
French	professional (B2)
Spanish, Russian	conversational

Alessandro Paolo Alghisi

Senior Full Stack Engineer

SENIOR · 11+ YRS

React · TypeScript · Node.js · Python · PostgreSQL · AWS · LLM / RAG · ex-Google intern ×2

PROFILE

11+ years of production code, nearly all of it full stack: Node.js and Python on the server, React and TypeScript on the client. At Sector Labs I was part of the small team that built Bayut.com and Zameen.com from nothing to millions of monthly users. Before that I interned twice at Google, and my Chrome patch (pinch-to-zoom in the PDF viewer) still runs on hundreds of millions of devices. I grew up on competitive programming, two national Olympiad medals and 780+ solved problems, so I tend to measure before I optimise and think hard about edge cases. For the last three years I have also been shipping LLM features: RAG, copilots and agent workflows.

ALGORITHMS & COMPETITIVE PROGRAMMING

- 2× **Bronze Medal**, Romanian National Olympiad in Informatics, 2013 and 2014
- 780 **780+ problems solved**: infoarena 400, LeetCode 300, Timus 80
- 10 **10/10 in Informatics (C/C++)** on the Romanian Baccalaureate
- ★ **Prizes** at the Grigore Moisil, ITeam_net and MindCoding inter-county contests

EXPERIENCE

Senior Full Stack Developer · Freelance (Contract) — Cluj, RO · Remote · **Oct 2026 – Present**

- Android and iOS field-service apps for a fire-safety maintenance firm: live GPS view of every technician, defect photos filed to the right client with location and timestamp, AWS backend and storage. Client websites in React, TypeScript and Node.js.

Senior Full Stack Developer · Raw Geeks — Cluj, RO · On-site · **Jan 2026 – Sep 2026**

- Led full stack and AI features on React (Hooks), TypeScript and Node.js apps built on Gulp; drove the AngularJS-to-React migration and took part in architecture decisions.
- Chat copilots, smart search and content generation with the Vercel AI SDK (OpenAI, Gemini): streaming, tool calling, structured JSON. RAG on pgvector and Pinecone with a prompt-eval harness that kept answer quality stable between releases.

Senior Full Stack Developer · Complaion — Milan, Italy · Hybrid · **May 2025 – Dec 2025**

- Python (FastAPI) REST services on PostgreSQL and React + TypeScript front ends for a regulated compliance platform; OAuth with Google and Microsoft Entra ID, file sync with OneDrive, SharePoint and Google Drive.
- LLM pipeline extracting and classifying regulatory documents against strict JSON schemas with human review; agentic tool calling so compliance officers query policy data in plain language.

Senior Video & Full Stack AI Consultant (Contract) · Freelance — Remote · **Sep 2024 – Sep 2025**

- Built Collab, a Zoom-style app in React / React Native (Expo) + TypeScript over WebRTC with a shared Monaco IDE (live cursors, run JS/TS/Python/Go/C++); Zoom Video SDK and Cisco Webex POCs plus the SOC 2, licensing and scale evaluation.
- RAG (OpenAI embeddings + pgvector) and LangChain agents that cut client support response time ~60%; Node.js/Express and Python services; React SSR redesign that lifted engagement ~50%; AEM components (HTL, Sling, OSGi).

Full Stack Engineer · Sector Labs (Bayut.com, Zameen.com) — Cluj, RO · **Sep 2017 – Mar 2024**

- Part of the small senior team that built Bayut.com, Zameen.com and other property portals from scratch and scaled them to millions of monthly users.
- Led the React / Redux / TypeScript front end with SSR: core features, render and bundle performance, Redis caching on the hottest pages.
- Node.js and Django services on PostgreSQL, MongoDB and AWS; kept the legacy PHP/Laravel platform in sync while migrating it to Node.js, Python and React.

Senior Software Engineer · Hewlett Packard Enterprise — Cluj-Napoca, RO · **Feb 2017 – Sep 2017**

- LoadRunner's C++ web-protocol engine (VuGen): features and client defect fixes, cookie and session-correlation bugs traced with Wireshark; ~25% efficiency gain.

Software Engineer Intern · Google, Logs — Mountain View, CA, USA · On-site · **Aug 2016 – Nov 2016**

- Release-safety system wired into Google's release framework; C++ tool deciding if a policy is safe to ship from rule presence and ratios; logging prototype ~15% faster.

Software Engineer Intern · Google, Chrome — Kitchener, ON, Canada · On-site · **Jan 2016 – Apr 2016**

- Pinch-to-zoom for Chrome's PDF viewer in C++ and JavaScript (touch events, zoom/pan linear algebra), merged in Chromium (codereview.chromium.org/1881603002).

Software Developer Intern · Algotech Solutions — Cluj, RO · On-site · **Jun 2015 – Aug 2015**

- Node.js REST APIs, SQL, React and jQuery; my first production React/Node code.

Software Engineer Intern · Yardi Systems — Cluj, RO · On-site · **Jan 2015 – Mar 2015**

- Perl tooling and web features for real-estate data systems.
